IZOLYATOR

Centuries-old traditions — state-of-the-art technologies

Happy New Year 2018!

2017 became a year of achievements and international cooperation development. We found reliable partners in European and Asian countries, made a contribution to the strengthening of ties between the national power systems of Russia, Vietnam and India.

Today, we set new global targets for ourselves. It is a good tradition to introduce new materials and technologies to our consumers every year; and we are prepared to grow our exports in 2018, promoting the Made in Russia brand worldwide.

We wish all our colleagues and partners cosmic-reach success, every chance to explore the limitless space of ideas and opportunities.

May 2018 bring us all good fortune, solve the most difficult problems and be a year of success and prosperity for our staff members!

*Dr. Alexander Slavinsky
Chairman of the Board of Directors, Izolyator*
