

Open international event and full range of type tests of high-voltage bushings in the country of their direct operation on the basis of the Central Power Research Institute of India

Izolyator company has more than 120 years of experience in the development and production of high-voltage equipment. We always try to be open to our partners.

We are proud to inform you that in 1st quarter 2019 the Izolyator company is holding a **comprehensive open international event** dedicated to the beginning of the supply of solid **RIP insulation to ultrahigh voltage classes 420kV / 3000A and 800kV / 2000A to India.**

An event of this scale is the undoubted recognition of the quality of the products of the Izolyator brand both in India and throughout the world. In the light of this turning point, Izolyator decided to conduct a full range of type tests of high-voltage bushings in the country of their direct operation on the basis of **the Central Power Research Institute of India**, the generally recognized world leader in electrical and special testing of electric power products.

The type test program includes a full cycle of electrical, current and special seismic testing of 420kV / 3000A and 800kV / 2000A bushings. The final stage of the main **Type test scope in the upcoming international event will be the seismic resistance test of 800kV / 2000A bushing** which will be the most spectacular and unmatched event in the history of testing and in the whole international practice. The main part of the event will include an open technical conference with the possibility of discussing all aspects and technical features of operation, installation and maintenance of bushings with RIP insulation for ultrahigh voltage classes made by Izolyator, and a gala dinner.

In confirmation of our openness and readiness for dialogue, high-voltage equipment consumers will be invited to participate in this event - representatives of grid companies and manufacturers, partners from Europe, Russia, Asia and the Middle East.

Approximate time of the event: February-March 2019.

Venue: CPRI Test Complex, Bengaluru, Karnataka, India.

You will be informed about more accurate dates additionally.

We kindly invite you to take part in an open international event and would be grateful to receive your prior consent.
